bd. Ștefan cel Mare și Sfânt 3, Chișinău

the small gallery | **6 pm**

- workshop of creative writing
- Reading of the texts
- soup testing
- Atmosphere

The Literary club

The Literary Club was created in February 2006 by the side of the unions of writers from Republic of Moldova and Romania. The meetings, which are held every Monday, consist in the reading of yet unpublished texts that belong to different generations of writers. Every reading is followed by a critical debate related to the presented texts.

The main goal of the Club, on one hand is to encourage the authors to write better texts and on the other hand to make the audience meet with the contemporary Moldovan literature.

The club is open to all writers who are willing to confront directly with the literature lovers.

Another goal of the Club is to contribute to the emergence of new generations of writers and to promote the local literature.

The members of the Literary club are also active outside the meetings, many of them were involved in several important cultural events like: *The Spring of the Poets*, poetry performances organized at *Mihai Eminescu* National Theater and at *Alexei Mateevici* Poetical Theater as well as readings of poems in the public space (the *Ștefan cel Mare* Park and in trolleybus), and at the *Alecu Russo* university in Bălți.

Also the Club fosters the establishment of connections among the creators from other fields of art: visual artists, contemporary art creators or actors and stage directors, with the aim to improve the circulation of the ideas and the works of art in different cultural milieus and to contribute to the creation of an *art world* in this area.

curator – **vladimir us**

The project **Landscape** is conceived as a critical review of the art language and display modalities applied by different artists in their work, who, in order to pass their message, make use of a classical art genre.

This curatorial proposal tries to demystify the **landscape** genre of art that became a cliché for the local artists and which in a certain way was 'nationalized', being included in the program of different institutions like the National Art Museum of Moldova (thematic exhibitions), Centre for Contemporary Art, Chişinău (yearly contemporary art symposium CarbonART), Republican Lyceum of Fine Arts „Igor VIERU” (summer practice) and other organizations and initiatives like 'the wonder field' (Mihai Eminescu Theatre square), libraries and medical centres (exhibitions) among them.

Being practiced by all generations of artists on different occasions like art symposiums or study visits outside the city are, or when executing thematical compositions as part of the artistic education program, this art genre is more and more imposing its presense in the collective mentality of the art circles but also of the broad public.

Even more, the contemporary artist today, once s/he graduated any of Moldovan art education programs, inherits a certain manner to visualize the things, in a tight connection to the art genres promoted in our cultural space and to the **landscape** among them.

The project **Landscape** intends to offer a picture of our times in the process of transformation, but on the other hand it tries out the viability of this art genre in the context of contemporary art.

which way the surrounding us **landscape** modifies / if it's development is considered by the local urban planners / rural culture, ecology and globalism / the importance of the garden around the house / if the nature is ugly / the problem of painting with green or **landscape** as an exercise of colors / aesthetic and beautiful / **landscape**(commodity versus **landscape**(medium, according to W. J. Tom MITCHELL / its reflexive potential and capacity to represent contemporary problems / the question of its development are few aspects that are tackled by the project **Landscape**.

Being considered one of the favorite art genres practiced by the local artists the project will develop by presenting in the future, in a similar perspective, two other exhibitions grouped around the **portrait** and **still life**.

The project **Landscape** launches this cycle of exhibitions and proposes to the public the art works realized by few generations of artists from Moldova and abroad who have a particular interest for this art genre.

One of the compartments of the exhibition is composed out of the art works realized between 1904 and 2005, offered by the National Art Museum of Moldova and borrowed from private collections, whose authors did significant work and, with exception of few of them, are not any more among us. Another part of the exhibition shows works done by the pupils of the Republican Lyceum of Fine Arts „Igor VIERU” where the educational program offers a special place to the study of nature. The rest of the show puts forward the contemporary creation presenting artists from Bulgaria, France, Germany, Moldova and United States of America with artworks executed during the last 3-5 years and new works.
